

For the first time, players can create their own F1® team by creating a driver, then choosing a sponsor, an engine supplier, hiring a teammate and competing as the 11th team on the grid. Build facilities, develop the team over time and drive to the top. Customise your 10-year career mode, with a choice of F2™ Championship introduction options and season lengths to allow for a more exciting, multiple season, career. The addition of split-screen racing, a new steering assist and a more accessible race experience means that you can enjoy the game with friends, no matter what your skill level. F1® 2020 features all the official teams, drivers and 22 circuits, including two new races: Hanoi Circuit and Circuit Zandvoort. Online connection required to download the final teams' 2020 cars (as applicable) and F2™ 2020 season content.
